jannifer@autismrec.net or call 2854-9113.

Autism Recovery Network and Hong Kong Junior School

Proudly Presents

Kenneth A. Bock, M.D., FAAFP, FACN, CNS

You are invited to a Q&A session with Dr. Kenneth Bock, world renowned DAN doctor and author of "Healing the New Childhood Epidemics: Autism, ADHD, Asthma, and Allergies". Dr. Bock is at the forefront of the biomedical movement. As described in his book, Dr. Bock's groundbreaking "Healing Program" offers hope to families struggling with the autism epidemic. His highly individualized plan look at the disorder from a whole body perspective, treating not only the symptoms, but the root of this complex disease as it uniquely affects each child. The Healing Program includes:

- Eliminating future exposure to toxins thru dietary modifications and environmental controls
- Removing existing toxins from the system thru the body's own natural detoxifying processes
- Healing the damage that the toxins have triggered
- Restoring proper function of the nervous system, the immune system, and the gastrointestinal system

Dr. Bock graduated Summa Cum Laude from the State University of New York and Buffalo in 1973 and went on to receive his M.D. with Honors from the University of Rochester, School of Medicine, in 1979. He is Board Certified in Family Medicine and is a clinical instructor in the Department of Family Medicine at Albany Medical College. He is a certified clinical nutrition specialist and has demonstrated advanced proficiency in chelation therapy. Since 2004, Dr. Bock has been a site investigator for the Trial to Assess Chelation Therapy (TACT), sponsored by the National Institutes of Health (NIH). For the past 25 years, he has dealt with complex medical problems by integrating alternative modalities with conventional medicine into a comprehensive integrative medical practice. For the last eight years, he has focused this approach on children with autism spectrum disorders and ADD/ADHD.

Dr. Bock will be signing his book "Healing the New Childhood Epidemics: Autism, ADHD, Asthma and Allergies." at the Q&A
